We appreciate every comment/idea, knowing that our fan-base & follow player community are important and their opinions you have any problems, please feel free to contact us. cs@digipotato.cn. Delivering pain gives players the feeling and experience of what survival will look like in the post-apocalyptic world. Therefore, all situations that a survivor might encounter have been examined and simulated to some extent. To make the game more interesting, let's incorporate many stories throughout the game. Delivery from Pain has a lot of random resources and is one of the most important assets in the game. Players can use them to create tools. Exploration and construction activities were carried out in the residence. Every day in the game happens as an authentic life. The character will switch to stealth mode when the zombie is heard. The character can run if there are no zombies around. On an open map like a park, the player can use traps to trap small animals as food. Delivery From the Pain is an attractive survival game that you can't miss. The story begins when Faith Energy, a cancer drug research center, suddenly interrupted contact with the outside world. The reason is that in the investigation of a vaccine. Turns out a baffling epidemic turns humans into zombies. As one of the trapped survivors, you must find your escape from this place completely. Delivery from Pain is a combination of Day R Premium and Live or Die. Players will easily find the similarities of these games by playing the survival mechanism in the game. In addition to food and drink, find more ingredients to create items to increase your survival in this world. You're not a superman in the game, and that makes Delivery From the Pain much harder. There are different zombies. To treat them properly, you must first find their weaknesses. On your adventure, you'll meet other survivors. What you do with them will affect the outcome of the game. So, make an informed decision. Kill them for more resources or work together to fight disaster. It all depends on how you play. Plan everything, build a shelter and create powerful weapons. However, remember that sometimes violence is not the way to deal with everything. Be flexible to get to the right solutions for every situation. Survival is never easy. A person's life or death isn't just about skills and experience. Sometimes it's lucky they're on the road. But what if you're not alone in this place? How will your thinking about a post-pandemic world completely change? Then, try to experience Delivery from Pain. If you like the zombie survival genre on your phone, Day R Premium and Live or Die games are no strangers to players. But if you are underestimating the delivery of pain, then you are wrong. seem to be similar, the way they present the world in the zombie pandemic is different. At the beginning of the game, you will decide which character to start your survival war. Each character will have different weaknesses and its history is also completely different. It will directly affect your in-game gaming experience. We won't suggest which character to choose which one because each story is equally different. It is best to play again a couple of times and choose all the characters to enjoy the full content of Delivery From the Pain.In addition to the basic instructions, the story that leads to the beginning of the game is different for each character. So don't worry about being boring. The overall plot of the game is that you're alone in the middle of an area suffering from a pandemic. Although you've tried to get in touch with the outside world, all you get is information about an area marked on the board. You're out of sight with the promise that someone's coming there to help you. Before you get there, survive on a journey in the middle of a pandemic. No need to enter more. Fans of this genre know this very well. As noted above, Pain Delivery is a combination of Day R Premium and Live or Die. Players will easily find the similarities of these games when playing, especially the survival mechanism in the game. In addition to food and drink, find more ingredients to create items to increase your survival in this world. All of that comes with your own time of day. There are 24 hours a day. You can only travel during the day until 6 pm. When night falls, you just have to stay in the shelter and do what you can do or prepare for the next day. However, everything is not so simple. Humans have the three most essential needs for eating, sleeping and having sex. Of course, in this pandemic world, it was a reward to eat and sleep. But in Delivery From the Pain, it was a completely different story. Even if you want to delete the game, you still need to sleep. Only sleeping can increase a very important metric in this lucidity. If someone plays for a long time, they will know that in the survival game, the most valuable thing is time. Because there are so many things to do while your time is tight. And it can only improve health through sleep. The sanityless human body is often prone to errors, as its actions will lack precision and slowness. This inconvenience also makes you spend a lot of time surviving and dozens of daily activities. Therefore, it is best to give the character enough sleep from three hours to six hours. As long as there's time to rest and resuscitate, that's fine. The calendar in this game is not very different from Day R Premium and Live or Die. You'll take to the streets during the day to loot. And at night, it's just inside. Just come home a little late and you become dinner out there. But the attraction of pain delivery does not come from the difficulty of survival. Although they're all non-player characters, they're not interested in things that pack you as Day R Premium and Live or Die. Everyone has their own story. Only when the zombie epidemic appears will people take the time to and understand each other. Honor the game people and make your rescue journey much shorter. You know you're not alone. And you're human. Delivery from Pain MOD APK is an indie zombie survival game. In addition to the mobile version, you can also try the PC version that is still in development. In the mobile version, you can play the first chapter and open it for free. After that, pay some money if you want to experience the full content of the game. Pain delivery will focus on exploiting the human aspect rather than the horror of the undead. It allows you to choose your decision to survive. Survival.
